

## Integrated Accounts Payable Automation

With native, real-time integration, AP Express for JD Edwards is a cloud-based AP automation solution for invoice entry and approval, resulting in faster invoice processing time and improved accuracy. Accessed via a web browser, AP Express runs securely in the cloud. Some features, such as invoice approval, are also available on your mobile device.

### SMART FUNCTIONALITY

AP Express leverages the data in your JD Edwards application (companies, business units, charts of accounts, subledger data, etc.) to enable the creation of invoices which are later imported, along with the invoice image, into JD Edwards. Workflows in AP Express ensure invoices are properly routed and image archiving enables searchability of your AP invoice information.

1

Upload,  
email, or scan  
invoices.

2

Data captured  
& automatically  
entered in  
data form.

3

Data validated,  
routed for approval  
& submitted to  
JD Edwards for  
processing.

4

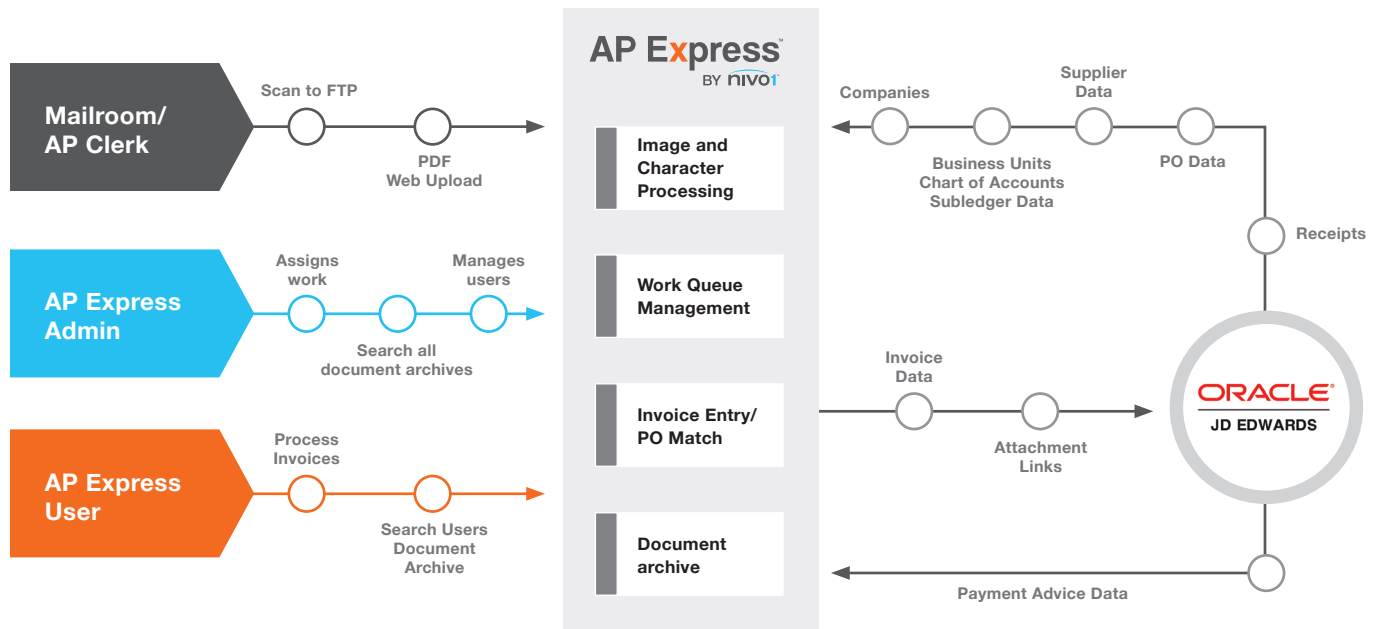

Information  
is archived &  
reporting is  
available.

# AP Express Functions as an Extension of JD Edwards

Nivo1’s in-depth knowledge of JD Edwards, as well as how the accounts payable process works, allowed us to design AP Express for JD Edwards to function as an extension of your JD Edwards application. We can automate your invoice processing, approval, and reporting without using flat file processing to transfer data or need to make modifications to your JD Edwards installation.

We designed our integration to work with existing JD Edwards infrastructure, to leverage standard business processes, and to use terms already familiar to you. We even designed the AP Express user interface (UI) to make it easy to use for users accustomed to the JD Edwards UI.

The close integration of cloud-based AP Express and your JD Edwards ERP suite extends your JD Edwards Payables application to give you a more complete view of your organization’s payables liability while minimizing staff training.
